About HCH Enterprises LLC.

HCH Enterprises, LLC, a minority owned business, provides cost effective solutions to meet your business, government or organization's needs. We provide a wide array of services including Managed IT Services, Program Management, General and Lab Administrative Management, Network Infrastructure/Security, IT consulting, Network and Systems Staff Augmentation, and Facility Security. We combine our architectural design and development of the system's environment emphasizing the integration of industry leading-edge network technologies while maintaining operational efficiency. We provide wide area network engineering, security engineering, network conversion and implementation rollouts in support of network backbones and data centers.

Since we bring innovation in technology and outstanding project control to Commercial, Government, and Private Entities, we are able to meet our customer's needs for a responsive and professional support services.

Customers

Our past performance includes but is not limited to the following:

- Microsoft
- Rhode Island USFPO Air National Guard
- Rhode Island State Offices
- NUWC
- Dell
- Connecticut Social Security Offices
- HubTech
- Danya International Workforce Software
- Genesis HealthCare
- KPMG International

Differentiators

As a small business we understand that referrals are essential to the survival of our company.

By having a small company, we are able to develop strong relationships with each of our clients because we can focus on the customer and system user. Our staff provides on-site support to solve the customer's needs without them having to go through several departments or a 1-800 number to receive assistance.

At HCH enterprises, we encourage our staff to gain certifications through various employment programs. The staff holds a wide range of certifications so we can provide a variety of services to our customers.

Company Experience

HCH Enterprises, LLC provide services to clients that are in the federal defense arena, federal civilian agencies, financial, health, and telecommunication industries. Managed by IT professionals, this is realized by applying features such as high availability, redundancy, fault-tolerance, high security and contingency/disaster recovery planning

Our company teams with small and large businesses when necessary to increase our overall depth and geographic reach. This increases our ability to best meet customer's need for a responsive, compliant engineering, and professional support services organization.

At HCH Enterprises, key aspect of management is the commitment to provide quality communications throughout our organization and that of our clients.
